

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

**1. (Previously presented):** A method of developing a dialogue-enabled application for executing on a computer that enables a human and a computer to interact, comprising the acts of:

(a) inputting instructions specifying the flow of a conversation to a design tool, said design tool producing a data file, said data file containing information relating to prompts, responses, branches and conversation flow for implementing a programmer-defined human-computer speech-enable interaction; and

(b) instantiating an interpreter object within an application, the interpreter object interpreting the data file to provide the programmer-defined human-computer dialogue-enabled interaction defined by the data file.

**2. (Original):** The method of claim 1 wherein said data file further contains information concerning a speech recognition engine.

**3. (Original):** The method of claim 1 wherein said data file is automatically stored.

**4. (Original):** The method of claim 1 wherein said inputting of instruction takes place through a graphical interface.

**5-9. Canceled.**

**10. (Previously presented):** A dialogue flow interpreter (DFI) for use in computer-implemented system for carrying out a dialogue between a human and a computer, wherein the DFI comprises computer executable instructions for reading a data file containing programmer-predefined information concerning prompts, responses, branches and conversation flow for implementing a human-computer dialogue, and computer executable code for using said information in combination with a library of shared objects to conduct said dialogue.

**DOCKET NO.:** TN222/USYS-0083  
**Application No.:** 09/702,224  
**Office Action Dated:** June 30, 2005

**PATENT**

**11. (Original):** A DFI as recited in claim 10, wherein the DFI is implemented in an application comprising, in addition to the DFI, a language interpreter, recognition engine, and voice input/output device.
